DETAILED ACTION

This is the first action relating to serial application number 09/926,158, filed 01-02-2002.

Claims 1-2 are currently pending.

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. This application has been filed with informal drawings which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claim 1 is rejected under 35 U.S.C. 102(a) as being anticipated by Yagasaki et al.('830). Yagasaki et al. discloses the claimed invention including the belt comprises a pair of ring slots (S), a large number of elements (14) in the ring slots, the metal blocks includes a neck (7), a pair of ears (6), an element body (3) integrally connected to the lower portion of the neck, a pair of left and right saddle faces (1), a pair of left and right V-faces (2), a pair of left and right recesses (not labeled) in the lower edge of the element body (3). It is apparent the upper end is characterized by an upper end and a

Art Unit: 3682

lower end (see attached drawing) and the saddle face is characterized by an inner end and an outer end (see attached drawing) such that a first line connecting the lower end of the body to the upper end of the V-face is determined and a second line connecting the lower end of the V-face and the inner end of the saddle face is determined, and a position of the recess (not labeled) is determined in the vicinity of the point of intersection where the first and second lines meet.

Allowable Subject Matter

5. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kanehara et al.('251), Smeets et al.('313), Aoyama('020), Ohnuki('025) and Koppelaars('049) discloses a transmission belt comprising a plurality of metal elements having a neck, a pair of ears, a pair of V-faces and a pair of slots with a pair of saddle faces.
